

Railroad Project

Rail Provides Key Ingredient

Effingham Railroad is obviously not an ingredient for making Krispy Kreme doughnuts, but it was an important component in Krispy Kreme's decision to locate in Effingham, IL. The Effingham Railroad, a shortline connecting both the CN and CSX, and managed by Agracel, provides a competitive rail position for Krispy Kreme's new mix and distribution facility.

General Building Features

Size: 187,538 sf, 14,470 sf office space
